The theory of my scheme, your Excellency, is that boys should come and pass before such a board as I have spoken of in anatomy, physiology, chemistry, and elementary surgery. They must study at these subjects for two years before being admitted to the examination. They must produce a certificate of their study at this hospital or some other equally constituted hospital, and the study must be carried on under some legally qualified man. I would propose also that they wast previously have studied at this or some other recognised school, so that there may be some assurance that they understand English or whatever other lanthe intelligence that his mission in Touquia had gauge may be decided on. My boys understand English thoroughly as regards reading it but I must acknowledge the kindness and forbearance with which my brothren have overcome that difficulty of expression which must be more or less present in all who attempt to learn a for-

eign language, without practice in speaking it and they have got at that knowledge which lies behind. These lads having come here now, I propose at the end of the next two years they should go to Shanghai. My object is to ensure the lisinterestedness and thoroughness of the examination. IN SUMMARY JURISDICTION.

This case was partly heard the previous Friday, being a claim on the part of Rumaldi, an Italian seaman, against the defendant, the master of the Chinese barque Kwong Fong for balance of wages claimed to be due. The defendant refused to pay the amount as he said the plaintiff had shipped with him as an able seaman, and had proved himself incapable to do the work he shipped for. He had in consequence disrated the man, and had employed another man to do his work. The defendant had received an advance for his services. His Lordship referred the case to the Shipping Office for the man to be discharged there in the usual way, and the circum-

Mr. Descon then proceeded to argue that there was no case made out of a reasonable presumption that defendant had committed the offence named in the warrant, and he said he thought he could show satisfac-

torily that there was before the court no evidence which raised a presumption upon which his Emanuel, admitted being a straggler from his Worship could act, and that being so the defendant must be discharged. In the absence of the original agreement the ovidence which he put joined the Singapore Police Force on the 21st April, 1885, and be should be able to show that the offence for which it was asked Spooner should be sent back to Singapore, had not been passed, and did not, therefore, apply to his case. There were three Ordinances in Singapore relating to police engagements, &c., the first was "the Police Force Ordinance," No. 1 of 1872, the next was Ord. 9 of 1831, and the third Ord. 11 of 1885 which was not passed until the 9th June of that year, some two months later than the date of the Singapore Police Force, and they must consider whether this Ordinance could be made to apply to the case in question. Of course if the Ordinance could be made retrospective in its effect, he should not have a leg to stand upon. He thought, however, his Worship would see that it was not retrospective in any way, and an Ordinance which did not purport to be retrospective could not be retrospective. In fact t'e wording of the Ordinance showed that it v intended to apply to future events, and no to have a retrospective effect upon what had taken place already. My last illness began June 31d, 1882, and continued to August 9th, when I began to take the Syrup. Very soon I could do a little work. The cough left me, and I was no more troubled in breathing. Now I am perfectly cured. And ch, how happy I am I I cannot express gratitude enough for Seigel's Syrup. Now I must | NORTH BRITISH AND MERCANTILE tell you that the doctors in our district distributed handbills cautioning people against the medicine, telling show it would do then no good, and many were thereby influenced to destroy the

Seigel pamphlets; but now, wherever one is to be found, it is kept like a relic. The few preserved are borrowed to read, and I have lent mine for six miles around our district. People have some eighteen miles to get me to buy the medicine for them, knowing that it cared me, and to be sure to get the right kind. I know a woman who was looking like death, and who told them there was no help for her, that she had consulted several doctors, but none could holp her. I told her of Seigel's Syrup, and wrote the name down for her that she might make no mistake. She took my advice and the Syrup and now she is in perfect health, and the people around us are amazed. The medicine has made such progress in our neighbourhood that people say they don't want the doctor any more, but they take the Sveep.
